Battling ropes-battle with the beats

You don't always have 3 hours to kill at the gym. You need to make the most of your time by getting in a quick, yet efficient workout that is going to work all muscles and not make you feel like you should have done more. Battle rope training torches about 10 calories per minute—more than both burpees and squats! Battle rope is an excellent way to improve endurance, strength, power and skill due to its functional execution. Whip yourself into shape with the rhythm and beats of the music and get a killer conditioning workout all in one go.

***Fat loss depends on the intensity of cardio exercises done and the fitness level and weight of the person.**
